PROFESSIONAL SUMMARY

First Class Honors Cybersecurity graduate (De Montfort University, July 2026) experienced in shipping end-to-end solutions, including a faculty-commended AI SOC dashboard and a functional vehicle-logistics platform. Certified in Anthropic's AI Fluency and Claude 101; practiced at translating technical security frameworks for non-technical stakeholders and building with Claude under resource constraints.

SKILLS

- **AI & Automation:** Claude (Anthropic AI Fluency, Claude 101), generative AI engineering (IBM), Python automation, data visualization and dashboards.
- **Security:** Splunk, Wazuh, SIEM rule tuning, EDR, Nessus, Burp Suite, Wireshark, MITRE ATT&CK, packet analysis.
- **Networking & Systems:** VLAN/NAT, routing, firewall rules, Linux (Ubuntu, Mint, REMnux, Kali), Windows.
- **Languages:** Python, C++, SQL.

EXPERIENCE

Receptive Tech Communications	Lahore, Pakistan
<i>Cyber Security Intern</i>	Jun 2025 – Sep 2025
• Tuned SIEM correlation rules and alert thresholds; threat-detection accuracy rose 20%. • Cut endpoint vulnerabilities 25% through recurring scans and patch verification, confirming fixes actually landed. • Rewrote escalation matrices, which brought incident response times down 15–20%.	
Telstra (Forage)	Remote
<i>Cybersecurity Intern</i>	Aug 2025
• Contained a simulated malware attack under time pressure, cutting projected threat impact by 80%. • Wrote the post-incident analysis: three vulnerabilities identified, five concrete improvements recommended.	
Mastercard (Forage)	Remote
<i>Cybersecurity Analyst Intern</i>	Aug 2025
• Flagged and reported phishing threats as part of the Security Awareness Team. • Assessed where employee awareness was breaking down, then rolled out targeted training built for mixed technical and non-technical audiences — enabling the organization to catch phishing on its own.	
Deloitte Australia (Forage)	Remote
<i>Cybersecurity Intern</i>	Aug 2025
• Analyzed web activity logs for incident indicators and investigated the suspicious user activity they surfaced.	

PROJECTS

- **WalSec A-TIOC Hub** — *AI SOC & Threat-Intelligence Dashboard (final-year project)*
- Scoped and built end-to-end: real-time threat feeds aggregated into a local database, with a locally hosted LLM wired in for analysis.
- Highly commended by university faculty and formally recommended for publication.
- **ConstructOS** — *Vehicle-Logistics Platform for Construction Companies*
- Built a working platform for construction firms to track and manage vehicle logistics.
- Turned raw operational data into visualizations, interactive graphs, and automated sheets that non-technical managers could read without a walkthrough.

EDUCATION

De Montfort University	Dubai, UAE
Bachelor of Science (Hons), Cyber Security — First Class Honors (73%)	July 2026

CERTIFICATIONS

- AI Fluency & Claude 101 – Anthropic (July 2026)
- ISC2 Certified in Cybersecurity (CC) (March 2026)
- Generative AI Engineering Professional Certificate – IBM (Aug 2025)
- Cybersecurity Professional Certificate – Google (May 2025)
- Certified Foundations Associate (AI & Cloud) – Oracle (Jul 2025)
- Microsoft Certified: Azure Security Engineer Associate (In Progress) — Microsoft SC-900 (In Progress)

COMMUNITY INVOLVEMENT

- **Rural Infrastructure Development:** Aided in the construction and development of local mosques and schools within rural areas of Pakistan to improve community access to basic resources and education.
- **Healthcare Support:** Active and regular blood donor, contributing critical life-saving resources directly to healthcare centers, including Indus Hospital Pakistan.
- **Food Security Initiatives:** Organise and conduct recurring community food drives, actively managing resource distribution campaigns both regularly and during the month of Ramadan.
